

The BUP weekly

Week 19, 2020

Spring flowers at sundown. Photo: Irina Iriser on Unsplash

Dear BUP friends,

The spring is here and although this year being quite different due to the ongoing pandemic, nature is buzzing with life. For us at the BUP secretariat we are focusing on shifting many of our activities online to ensure that we can still meet, discuss and exchange ideas. However, in a different format.

More information regarding the BUP symposium 2020 and its online format, will follow in the upcoming days. In the meantime, we have a packed BUP weekly at your disposal.

Stay healthy and enjoy!

With best regards,

The Baltic University Programme's coordinating secretariat

BUP secretariat news

Regeneration 2030 - Moved online

Regeneration 2030 is an action oriented meeting of young people, with the aim to mobilize youth to work for a sustainable Nordic and Baltic Sea Region.

- Open for students and PhD students at BUP member universities. Applicant has to be under 32 years of age.
- 22-24 of August 2020
- Online

The event will be hosted online. A second chance to apply will open in mid-May.

Read more about the summit at www.balticuniv.uu.se or www.regeneration2030.org

A second chance to apply will open in mid-May

Publish your Research Profile on the BUP web

As a researcher in the Baltic University Programme, you have the possibility to publish your research profile at the BUP website.

This is not only a good example of how you can increase your visibility, but also get in contact with other researchers from your field.

Read more about the BUP researcher networks at www.balticuniv.uu.se/bup-research/researchers/ and send your research profile by clicking the "Submit" button.

Riga Technical University invites students to the Summer school

Baltic School of High-Energy Physics and Accelerator Technologies 2020

The inaugural Baltic School of High-Energy Physics and Accelerator Technologies is organised by the CERN Baltic Group (CBG) - an international collaboration of eight institutions from the three Baltic states. This school will be an intensive learning course covering topics of high-energy particle physics, from the basic theoretical frameworks to the cutting edge research at the Large Hadron Collider (LHC), as well as the principles, technologies and applications of particle accelerators.

- 10 - 14 August 2020
- Klapkalnciems, Latvia
- Open for last year Master student or PhD student

Deadline 1 June 2020.

Bialystok University of Technology invites university staff to online conference

Universities role in difficult times

BUT would like to propose organizing an INTERNATIONAL ONLINE MEETING in the first half of June (proposed dates 9-10th June) to exchange and share our experience, ideas and opinions on the following topics:

- distance learning in current circumstances;
- impact of online education on future students outcomes;
- challenges of higher education institutions in this difficult period;
- international cooperation in the nearest future

...and to seek and draw together the initial conclusions from our debate at the international level.
