

**Department of Regional Bioenergy
Department of Sustainable Development
Department of Ecology**

under the auspices of the Dean of the Faculty of European Studies and Regional Development
at the Slovak University of Agriculture

Assoc. Prof. Oľga Roháčiková, PhD.,

cordially invite you to the 4th International Scientific Conference

**FAST-GROWING TREES AND PLANTS GROWING
FOR ENERGY PURPOSES**

(Theory and good practices of growing and energy use of biomass)

September 4–5th 2019 in Nitra

2nd Announcement

The aim of the international conference is to present a comprehensive view on the importance of biomass for its sustainable energy use. Results obtained from the studying functional processes that are responsible for the production potential of energy trees and plants under specific agro-environmental conditions will be presented. Another objective is to point to "good practice" experiences of growing and environmental impact of energy crops.

Innovative EU strategies related to the circular economy in terms of applied bioenergy research focused, in particular, on the latest trends in biochemical and thermochemical conversion of biomass to biofuels with higher energy density will be also discussed.

At the end of the conference, the participants will be able to take part in an excursion to the experimental plantation of fast-growing trees and plants in Kolíňany, biogas station and a laboratory for biomass gasification.

The Conference is intended for university educators, researchers, practitioners, PhD. students and the scientific public.

Languages of the Conference: Slovak, Czech and English
