<p>Name of the EduBalt mentor/collaborator: Dzineta Dimante</p>
<p>Aim of the project: The aim of the project – to facilitate the capacity of staff members and to develop competencies for implementing the principles of sustainability in higher education.</p>
<p>Target audience: Basic, master, doctoral, further education</p>
<p>Expected outcomes: Development of educational process in the context of ESD, cooperation, information, joint publications, sustainable community</p>
<p>Significance for the involved institutions (universities): Capacity of the academical staff</p>
<p>Which sustainable development goals are tackled by the project? The focus of the project is on effective maturing of an educational process to meet the challenges of current educational process and to train teachers in dealing with local and global challenges in teacher training for implementing education for the sustainable development in reaching the aims set by the UNESCO (skat. http://en.unesco.org/sdgs).</p>
<p>Short description of the project: Within the project we established the Regional Hub for SD. The Hub will have an open structure of a network that will invite all those who are interested in social innovations through the research on sustainable education. This project of Latvian higher institutions will facilitate the experience of each participant in search of local sustainability and mobility, developing material for lectures, mobile workshops and exhibitions. <i>Several meetings were planned:</i></p> <ol style="list-style-type: none"> 1. <i>DU UNESCO Chair's Summer schools that will take place in August in „Ilgas.” The first projects' results will be presented in the next seminar of EduBALT that will take place in autumn, 2017. As a result, joint publications will be planned.</i>

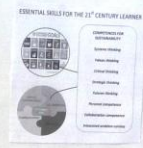

2. Rēzekne academy of Technologies. Workshop will be organized within the framework of the Internatioanal conference „ Society. Integration. Education” in May, 2018
3. *The 3rd international scientific conference „ Creativity and Innovations” (2018) organized by Liepājas University that will be included as a part in EduBALT project. Research will be presented in the regional higher institutions (scientific readings, exhibitions, discussions).*
